03/2022 | Cartago, Costa Rica  
Creation of a consultant application, I worked as a Full Stack Developer, Using Scrum as a project management methodology, GitHub as version control, SpringBoot for Back-End and Angular for Front-End

**AWS Management UCR,**  
*Front-end Developer | Academic Project*  
03/2021 | Cartago, Costa Rica  
Creation of a web application using the AWS API (<https://aws.amazon.com/documentation/>). This application was created in Angular. It shows all the EC2 instances that are running on the platform, deploy information about their status, allow them to stop if they are running and delete (terminate) them if they are stopped.
